This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

NOTICE.

The next edition of the Directory will be an International, and it will be issued late in 1899. It is under advisement to make some radical changes in this edition. The work was originally intended for the use of Naturalists', those who had use for and wished to make exchanges. Chemists were first added and from time to time other branches. It is now proposed to exclude Mathematicians, Physicists, Astronomers, Electricians, Photographers, etc. and possibly to make a separate edition devoted to such departments of science as are not included in the Naturalists' Directory.

Opinions as to the advisability of the change are invited by the editor.

Information in regard to deaths or change of address of names in the present edition will be thankfully received by the editor.

The Naturalists' Directory

TO LOVERS OF CANTALOUPS AND MUSKMELONS.

The undersigned, engaged in the selective culture of the melon (*Cucumis melo*), grows a highly interesting list of Fruits, including those most characteristeric, peculiar and delicious, from many foreign countries. Most of these are produced by no other grower, and their qualities and remarkable flavor have heretofore been nearly unknown, while several new varieties have originated with, and are introduced into cultivation solely by him.

FOREIGN CORRESPONDENCE RELATING TO MELONS DESIRED.
A Small Stock of Seeds for Sale.
Florida Plants, Fruits and Seeds to order.

DAMON'S

Ocean Wonders.

WITH NUMEROUS ILLUSTRATIONS.

Whatever else may be left at home, this volume should be placed in every satchel packed for the seaside. Mr. Damon is equally at home in picturing the gigantic Octopus or the tiny builders of the coral reefs. No fairy land can exceed in beauty the living flower gardens in the sea. Coral builders, how they work and feed; the birth of an anemone, house builders in the ocean, remarkable crabs and fishes, the devil-fish, the growth of sponges, etc., etc., from the minutest to a whale; all about the care of an aquarium, how and where to collect animals and plants and to keep them alive and healthy. Such a work is worth a library of romance and novels. Interesting and instructive, both to the young and old."

MICROSCOPES . . AND ACCESSORIES.

The Spencer Lenses have been considered superior to all others, in every respect, for more than thirty years, but until recently have been manufactured in small quanities. We are now prepared to ship goods immediately upon receipt of orders. Our factory is under the personal supervision of Mr. Herbert R. Spencer, who carefully inspects and tests all lenses before they are shipped.

Our new stand is now ready, and is acknowledged by all who have seen it, to be the most complete instrument of its kind.

Write for book of testimouials giving opinions of prominent microscopists and physicians, and catalogue which we send free on application.
